

# JASMIN KATANIC

katanic.jasmin@gmail.com | +38761676717 | jasminkatanic.dev | Tuzla, Bosnia and Herzegovina

Result-oriented IT Engineer with more than 8 years of experience, originally as a system administrator and later on as a software engineer. Understands the needs of clients and finds the ideal technical solutions.

## Experience

### SEEBA | Software Engineer

October 2021 – Present | Sarajevo, Bosnia and Herzegovina

- Collaborated seamlessly with developers, scrum master, and product owner to contribute to various large-scale projects, demonstrating proficiency from the initial sprint planning phase through development and final delivery.
- Successfully engineered and deployed multiple platforms and systems featuring multilingual capabilities, accommodating diverse user types, and seamlessly providing data to numerous web applications. Utilized cutting-edge technologies such as Next.js with TypeScript for the public frontend, Node.js for backend operations, React.js with TypeScript for the administrative panel, and employed GraphQL for efficient queries and mutations, complemented by robust MongoDB and PostgreSQL databases.

### Salt Mine Tuzla | System Engineer

June 2015 – October 2021 | Tuzla, Bosnia and Herzegovina

- As a lead IT engineer, I orchestrated the design and implementation of a robust network tailored to enhance the efficiency of the production process. Collaborating with a proficient team of technicians, I executed the deployment with precision.
- Additionally, I developed a streamlined SCADA interface using JavaScript to optimize user interaction, fostering improved operational workflows.
- Furthermore, I played a pivotal role in training and supervising two technicians, guiding them to successfully establish the company's comprehensive IT infrastructure from the ground up. This encompassed the seamless integration of essential functionalities such as file sharing, printing, and VoIP services, catering to the needs of 120 users and devices.

## Skills

Proficient with:

HTML • CSS • JavaScript • TypeScript • SCSS • React • Next.js • Headless • GraphQL • PostgreSQL • KeystoneJS • WordPress • Tailwind • Git • Bulma • Material UI • Node.js • PHP • Mantine UI • MongoDB • SQL • Cisco Script • Agile development • Responsive Design • Reliable Deployment • DigitalOcean services • Vercel • Netlify
