

JASMIN KATANIC

katanic.jasmin@gmail.com | +38761676717 | jasminkatanic.dev | Tuzla, Bosnia and Herzegovina

Result-oriented IT Engineer with more than 7 years of experience, originally as a network and infrastructure engineer and later on as a frontend developer. Understands the needs of clients and finds the ideal technical solutions.

Experience

SEEBA | Frontend Developer

October 2021 – Present | Sarajevo, Bosnia and Herzegovina

- Collaborated with developers, scrum master and product owner on projects, worked on multiple large projects from the early stages of sprint planning through development and delivery
- Created several e-commerce solutions both traditional ones using pre-existing solutions like WordPress and Headless solutions with different CMS's and a NextJS frontend
- Build an organization management application which incorporated multiple user types and served data to multiple web applications some of the technologies used were Next.js for the public frontend, React for the Admin panel, GraphQL was used for querying along with MongoDB and PostgreSQL databases varying between two based on clients' needs

Salt Mine Tuzla | Network Engineer

June 2015 – Present | Tuzla, Bosnia and Herzegovina

- As a lead IT engineer, designed a network for production process and with a team of technicians implemented the same design, network covers 40 kilometers or 25 miles of fiber optic network along the pipelines and number of pumping and control stations
- Built a simplified SCADA interface for the employees using JavaScript
- Trained and worked with two technicians and successfully built company's IT infrastructure from scratch. New network enabled file sharing, printing and VoIP for 120 users and devices

Freelance | Frontend Development

August 2013 – March 2021 | Worldwide

- Developed and deployed a website using JavaScript, which included user registration and subscription service using Direct Carrier Billing
- Developed number of personal and business Websites using React, some of which are still up and running today, see some of them in projects section on my website
